DETAILED ACTION

1. This is in response to the amendments filed on September 16th, 2008. Claim 56 is pending and has been considered below.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 16th, 2008 has been entered.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claim 56 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 3, 5-10, 12-17, 20, 24 and 32-42 of U.S. Patent No. **6,216,231**. Although the conflicting claims are not identical, they are not patentably distinct from each other because both inventions are drawn towards a similar technique of enforcing revocation in a distributed system which explicitly employs an identification certificate(*ie. initial assertion, initial statement, etc.*) that includes a freshness constraint, which is used by the authorities(*ie. distinguished principals, etc.*), to confirm validity. Thus, the Examiner respectfully submits that both inventions appear to disclose variants that would have been obvious to one of ordinary skill in the art at the time of invention.
5. Claim 56 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. **6,256,741**. Although the conflicting claims are not identical, they are not patentably distinct from each other because both inventions are drawn towards a similar technique of enforcing revocation in a distributed system which explicitly employs an identification certificate(*ie. authentic statements, initial assertion, authoritative assertion, certificate, initial statement, etc.*) that includes a freshness constraint, which is used by the authorities(*ie. trusted intermediaries, distinguished principals, authorities, etc.*), to confirm validity. Thus, the Examiner respectfully submits that both inventions appear to disclose variants that would have been obvious to one of ordinary skill in the art at the time of invention.

Claim Objections

6. Claim 56 is objected to because of the following informalities: the Examiner notes the recitation of "*said network*" in lines 5 and 14 the claim and should be amended to recite "*said public network*" in order to maintain consistency throughout the claim. Appropriate correction is required.
7. Claim 56 is objected to because of the following informalities: the Examiner notes that line 17 should be amended to recite, "...*statement pertaining solely to said user...*". Appropriate correction is required.

Claim Rejections - 35 USC § 112

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:
- The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
9. Claim 56 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
10. Claim 56 recites the limitation "*said request*" in line 23. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

11. Claim 56 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action; and if a timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) is submitted. The Examiner notes

that the instant application is a continuation of applications which have passed to issuance as the above two U.S. Patents relied upon for the nonstatutory double patenting rejection.
